MongoDB

PROFESSIONAL SUMMARY

Full-stack Software Engineer with a passion for building scalable, high-performance web and mobile applications. Experienced in architecting robust backend systems and crafting intuitive user interfaces. Committed to continuous learning and sharing knowledge within the developer community through mentorship and training programs.

WORK EXPERIENCE

Fullstack Software Engineer

2024 - Present

Contractual / Freelance

- Architecting and deploying scalable full-stack applications for diverse clients locally and internationally.
- Implementing robust backend systems using modern runtimes like Bun and libraries such as Hono.
- Developing responsive, high-performance web interfaces using Next.js and React.
- Managing complex database schemas and ensuring data integrity with Prisma ORM.
- Utilizing Docker for containerization, ensuring seamless deployment and environment consistency.

Backend Trainer / Lecturer

2023 - Present

GDG Addis Ababa University

- Conducting intensive backend development workshops focusing on modern web technologies.
- Designing and delivering curriculum covering RESTful APIs, database design, and server-side logic.
- Mentoring aspiring developers and fostering a culture of technical excellence within the university community.

Software Engineer

2023 - 2024

Moti Engineering

- Engineered in-house software solutions to streamline internal business processes and improve efficiency.
- Collaborated with cross-functional teams to identify requirements and deliver high-quality, maintainable code.
- Maintained and optimized existing internal systems, ensuring high availability and performance.
