Software Engineer and Addis Ababa University student (Construction Technology & Management / CoTM, Graduating Class of 2027) with 4+ years of hands-on experience building production web applications, mobile apps, and backend APIs. Creator of high-performing Telegram Mini Apps including Lehulum Exams (@lehulum_exams_bot). Summer 2024 Lecturer & Mentor for Google Developer Groups (GDG) on Campus at AAU, teaching backend architecture, REST APIs, and database management to CS and software development students.

🏢 PROFESSIONAL EXPERIENCE & MENTORSHIP

Backend Engineering & DB Lecturer / Mentor Summer 2024

Google Developer Groups (GDG) on Campus — AAU Addis Ababa, Ethiopia

- Lectured and mentored 120+ Computer Science and Software Development students at Addis Ababa University in backend architecture and database systems.
- Delivered hands-on technical workshops covering Node.js, Express, PostgreSQL, Prisma ORM, and database normalization principles.
- Guided student engineering teams in building production-ready REST APIs, implementing secure authentication, and writing optimized SQL queries.

Software Engineer 2025 – Present

Independent Consultant Remote

- Architected and shipped production web applications, backend APIs, and cross-platform mobile apps for international clients.
- Engineered Telegram Mini Apps featuring seamless WebApp state sync, automated bot commands, and low-latency API handlers.
- Containerized services with Docker and configured Linux environments for reliable, automated deployments.

Web & Mobile Developer 2025 – 2026

Lehulum Exams Ecosystem Addis Ababa, Ethiopia

- Built and deployed the Lehulum Exams Telegram Mini App (@lehulum_exams_bot), used by national exam students across Ethiopia.
- Engineered instant quiz evaluation algorithms, timed exam simulators, and daily streak tracking directly inside Telegram.
- Optimized mobile frontend speed and asset delivery for smooth operation even on low-bandwidth 3G and 4G networks.

Freelance Software Engineer 2022 – 2025

DNT Services & Remote Companies Remote (US & Canada)

- Built responsive client portals, corporate dashboards, and enterprise integration tools for international businesses.
- Engineered real-time data visualization platforms (Whalers App) handling live cryptocurrency transactions via WebSockets.
- Integrated third-party services including Stripe payment gateways, OAuth authentication, and external webhook pipelines.
